

## FREE CHECKLIST: HOW TO KEEP FLIES OUT OF YOUR RESTAURANT

### SEAL HOLES & CRACKS IN WALLS

Patch and/or seal anything that may be letting insects inside.

### INSTALL SWEEPS

Install floor sweeps along the base of doors where there is access to the exterior.

### SEAL WINDOWS WHERE CRACKS ARE PRESENT

Seal windows carefully, if you can, replace any cracked windows.

### IMPROVE CLIMATE CONTROL

Decrease the temperature slightly in your kitchen & restaurant. Flies thrive in warm climates, but do not like cooler temperatures

### REMOVE CARPET

Remove carpeting which may hold mold, dust and moisture and conceal the presence of pests.

### CLEAN KITCHEN DAILY

Paper trash, dust and dirt attract moisture and insects- be sure to clean thoroughly each day.

### REMOVE PLANTS

Remove any and all plants near the kitchen, especially flowering plants.

### CREATE A QUARANTINE ROOM

Designate a separate room for any incoming food and/or materials that could cause an infestation.

### REMOVE WATER SOURCES CLOSE TO BUILDING

Stagnate water is a breeding ground for insects. Be sure to remove any standing water around the exterior of the building.

### ELIMINATE TRASH

Eliminate any trash cans and/or dumpsters near the building- especially by any doors.

# ABOUT DUGAS PEST CONTROL

Dugas Pest Control is a locally owned and operated pest management company serving clients throughout southern Louisiana including Baton Rouge, New Orleans, St. Tammany & Lafayette providing commercial pest control services for businesses and industrial clients.
